Enhance Building's Durability with Cembrit Facades from CSS Facade Ltd

CSS FACADES

together, we bring buildings to life

For architects, builders, and designers seeking a versatile and high-performance facade solution, CSS Facade Ltd, a leading UK distributor of decorative cladding, is proud to feature the exceptional range of Cembrit fibre cement panels. Cembrit is a premier European manufacturer of fibre-cement building products, renowned for their durability, aesthetic appeal, and sustainability.

Cembrit facade panels are crafted from natural materials, including cement, water, and cellulose fibres, resulting in a product that is not only robust but also environmentally friendly. This innovative composition provides remarkable resistance to the harshest weather conditions, rot, and fire, ensuring a long-lasting and low-maintenance building exterior.

At CSS Facade Ltd, we offer a comprehensive selection of Cembrit's innovative product lines to meet diverse design visions:

- **Cembrit Patina:** This popular through-coloured board offers a natural, textured surface that develops a unique patina over time, adding character and a timeless elegance to any building.
- **Cembrit Cover:** For those seeking a bold and colourful statement, Cembrit Cover provides a vibrant and extensive colour palette with a water-based acrylic paint finish.
- **Cembrit Solid:** This through-coloured panel has a uniform colour from surface to core, making scratches less visible and ensuring a consistent appearance from all angles.
- **Cembrit Transparent:** Combining the natural texture of the fibre cement board with a durable, transparent topcoat, this option provides a sophisticated and resilient finish.

CSS FACADES

together, we bring buildings to life

As a nationwide supplier, CSS Facade Ltd is equipped to handle projects of all sizes. Our services extend beyond simple distribution. We provide expert advice, panel fabrication, and CNC services to ensure the Cembrit panels are perfectly tailored to your project's specifications.

"Our commitment is to provide our customers with the highest quality facade solutions, and Cembrit is a cornerstone of our offering," said a representative from CSS Facade Ltd. "Their dedication to innovation and quality aligns perfectly with our mission to deliver durable and aesthetically pleasing building materials."

Choosing Cembrit facades from CSS Facade Ltd means investing in a building exterior that is not only visually striking but also built to withstand the test of time.
